

# Summer Holiday Home Learning 2020

## Year 6

Due in Tuesday 8th September

### All About Me!

Produce a new profile page about yourself to help your new teacher to get to know you.

Steps to success:

- Lay it out how you like.
- It must be A4 sized.
- You can include collage, photos, drawings and magazine cuttings.

On the next page there is a **template** you can use if you wish.

### Project

In Year 6, our first theme will be **Good Night Mister Tom**. This book is the story of a young evacuee boy during **World War 2**.

Over the summer, we would like you to talk to or **interview** an older member of your family or a family friend. This person does not have to have taken part in the war but may have been a young child during or after the war.

Ask the person questions about what life was like during World War 2. You may want to ask about rationing, evacuees or life on the home front. You could ask about their VE Day experiences or you may want to ask them to share some stories about themselves or others.

We would like you to create a **presentation** based on what you have learnt from person your interview. It could be a PowerPoint, a video, a voice recording (like a BBC radio programme), a poster, or... whatever you would like to create to share what you have learned.

### Reading

Keep practising your reading!

You could join the **Silly Squad** and take part in the **Summer Reading Challenge 2020**, which is being run by Surrey and Hampshire libraries.

This year the challenge will be online. You can sign up and create a profile on the [Summer Reading Challenge website](#).

You set your own challenge to read as many books as you want to. Along the way, you'll receive rewards, play games and earn badges.

### Maths

Keep practising your maths skills!

You could take part in the **Summer Rocks** competition on [Times Table Rockstars](#).

Ask your teacher for your login details if you have lost them.

**Which Kite school will win the battle?**

You can also keep up your maths by playing **games**. Board games, card games, Yahtzee, darts... All of these are great for improving your maths so keep playing!
